

**Do you have a child
with a neuromuscular disorder like
Cerebral Palsy?**

**Would you like your child to reach
maximum potential and gain self confidence?**

Mind • Body • Motion

programs for higher achievement

Mind • Body • Motion programs are utilizing the philosophy and principles of Conductive Education (CE). CE is a system of education for individuals with cerebral palsy and other motor disorders of neurological origin. Our goal is to transform people with physical disabilities into active problem-solvers who use their cognitive abilities to practice and master everyday skills.

As Mind • Body • Motion (MBM) celebrates the Grand Opening of its new facility in Langhorne, PA, we are excited to offer the following programs for young children:

Parent and Child Program: (up to 4 yrs) This class introduces Conductive Education (CE) to families with children of a young age. The program creates an active, educational environment to nurture the children's motivation to solve simple problems and to complete useful tasks.

The conductor (Conductive Education Teacher) guides the parent and child through uniquely structured activities and utilizes an organized facilitation system to assure an effective and successful learning experience. Parents learn their child's potential which enables them to develop and implement appropriate learning activities into daily life situations. The program promotes the development of living skills, such as fine & gross motor activities, play-, social-communication and self-care skills. **Advance sign up for each six weeks session is required.**

Playgroup for Children with Cerebral Palsy (up to 5 yrs): MBM offers a Playgroup for children with physical disabilities (such as CP). The playgroup is designed to promote social interaction, proper positioning and active participation in various gross-, fine- and self-care activities. Sessions are tailored to each participating child's unique capabilities. Parents are welcome to utilize this time for their own, well deserved recreational time. Cost \$25 per session. **Advance sign up required.**

These programs are available year around with continuous enrollment. Winter/Spring classes are scheduled for Tuesday/Thursday Mornings.

For various other ongoing programs and services, please contact the center, or visit our website.
